PRESIDENT'S MESSAGE

"The future depends on what we do in the present" Mahatma Gandhi

Just like camaraderie founded on business is better than a business founded on alliance, in hypothesis, there is no difference between theory and practice. But, in practice, there is. Similarly, while competing with time in this fast pacing world, our business is striving to directly connect every individual into one conglomerate giant through information that is shared and distributed by easily transcending existing paradigms. The channels of grapevine communication have become the foremost tool permitting our society in taking a very different outlook towards the world.

As our patent insight that the most significant aspect of any business would be the way one manages awareness and wisdom within the society, we at Chaudhary Group (CG) have pioneered the initiatives, which have become the yardstick of quality and service to the social and business communities in this part of the world.

Once again, it gives me colossal gratification to bring to you, yet another issue of CG News. In present times, every realm of life is facing atrocities never encountered before in their very own ways and hence we dedicate this edition to the society that makes us. Therefore, we are focusing more towards our social commitment and how we discharge our duties proficiently as a responsible corporate citizen.

The past few months have been exhilarating and challenging. March marked many significant events that will go down in time as history repeats itself. 10th March, a historic day for the entire Chaudhary Group family, a day which marked the formal inauguration of the Ganga Devi Chaudhary Udyog Gram at Nawalparasi, the first integrated world class industrial park under the private sector in Nepal. This auspicious day also marked the inaugurations of CG Learning Centre, CG Medicare Centre and CG Kanchi Shankaracharya Temple. This day will be observed and celebrated for years to come.

As opportunities emerged, we made the most of it. CG launched various new products, some of which have taken the market by storm. Taking risks like none other while learning from them and then adapting to change, a change towards the global perspective has been the root of our growth and success. Yet, we continue looking beyond our boundaries towards our goal of touching life everyday.

Regards,

Binod K. Chaudhary
President & Managing Director

THE EVOLUTION CONTINUES TO PERFECTION

The last seven decades has the history of the fruition of a corporate giant, recognized not only in Nepal, but also over many parts of the world in its own right. As the Chaudhary Group evolved from a moderate trading house of the 1930s to the current status of the largest corporate house in the whole Kingdom of Nepal, the same can not only be seen but also be visualized through the glimpses of the Chaudhary House, the Corporate Head Office and its corporate logo, not to miss the corporate slogan.

The changes, in pursuit of excellence as we have grown, though were order of the day throughout the decades, there had been changes close to revolution to this part of world as we matched with the global standards by always exceeding the expectations by climbing higher. Today as we stand as a true corporate citizen by touching millions of lives everyday, we really are bitten a bit nostalgic as we recollect how far we have traveled and how our corporate office has transformed from a two storied office cum factory to a six storied corporate office and the transformation of the corporate logo and slogan from a local to global.

The SEEAI Complex, as a few still call it was the main production unit for two of our main joint ventures in electronics and consumer appliances. The complex, which housed the National Radio Cassette & Home Appliances and Sound Equipments & Electrical Appliances Industries (SEEAI) Pvt. Ltd, had also accommodated the entire administrative and other offices in one corner. The corporate slogan, "IN SEARCH OF EXCELLENCE WHILE GROWING" was the first phase and literally it was a period of growth in multifold.

The changes, in pursuit of excellence as we have grown, though were order of the day throughout the decades, there had been changes close to revolution to this part of world as we matched with the global standards by always exceeding the expectations by climbing higher.

IN SEARCH OF
EXCELLENCE
WHILE GROWING

AIMING HIGH
CLIMBING HIGHER

The second major transformation came during the early 90s with the entire production facilities finding its ideal places, gave our corporate office to convert itself into a five storied exclusive office with each major business interests taking its own floor. It was a period of not mere physical infrastructure, but also that of the underlying potential of the group that gave birth to a new corporate slogan, **"AIMING HIGH CLIMBING HIGHER"** with nothing less than the magnificent Himalayas as its background.

The last major change during the later years of this century had been not chiefly with the addition of one more floor to the CG House, the executive dining facility, but with the transformation of the corporate logo and slogan in tune with the quantum leap towards the globalization of the company, a result of the realization of the inherent and lateral potential of the Group. The new logo, which is an epitome of futuristic and global standards, has got an ideal partner in the slogan, **"Touching Life Everyday"**. As the company has grown leaps and bounds and as the same has become natural, our corporate slogan has changed itself in tune with the vision of the company to become "A Global Growth Company by 2005". ■
