

LG PROJECTOR

LG has been selling projectors internationally for years and recently entered the Nepal market. ISOS Pvt. Ltd, IT trading wing of Chaudhary Group has officially launched the LG DLP projectors. Currently 2 business models are available.

BS 275 is a SVGA (800 X 600 pixels) & BX 275 is a XGA (1024 X 768 pixels) business projector which comes with Digital keystone Correction, Auto Source Detection, Sleep Time, Auto Power Off & Auto Color temperature Control. LG's advanced technology will ensure all your presentation needs are met, with features such as **2,700 ANSI-lumens high brightness** allowing for easy viewing in a lit area and **2,200:1 high contrast ratio** rendering details and subtle color differences vividly.

Auto Color Adjustment function automatically controls the R/G/B Gain by sensing the color of the wall with its built in camera. **Auto Power Off** prevents the reduction of lamp life and electricity consumption by automatically turning off the power when there is no signal. **Expert Color Management** function allows the user to separately control the Gain (contrast), saturation, and the color tone of Red, Blue, Cyan, Magenta and Yellow.

All these functions make both models an ideal for small & large businesses as well as for Home Entertainment. ISOS also ensures the best price & guaranteed service for the product.

LG also manufactures projectors for other business, education and commercial applications. LG is a significant player in Pico (pocket) projectors which will be also introduced in Nepal market very soon.
